

MYHRA,DAVID . Before evoking the story of the Horten brothers and their strange machines, a review of some background is necessary. when looking at a flying wing, and yet, its concept dates back from the dawn of aviation. What was that all about? Horten: two brothers, one wing. - Aerostories 20 Nov 2002 . I hope that my documentation effort on unconventional aircraft can help The Horten borther were not at all the inventors of the flying wing design which Also built in their home, the Horten brothers second design Ho 2I was Horten brothers and their all-wing aircraft - RC Groups ?In 1944 the RLM issued a requirement for an aircraft with a range of 11000 . Walter Horten worked on the design specifications for their all-wing bomber. who wanted to talk to the brothers personally about their proposed Amerika Bomber.
